

README

Tim de Smidt // Mithmárië

INSTALL

- Go to itch.io/dan-mechanics/mithmarie
- Click “install for windows”
- **Unzip the installed folder** located in Downloads
- Navigate to mithmarie.exe under **Build**, run it
- Click More info
- Click Run anyway
- The program works when you see the “**Welcome**” message

HOW TO USE

[WASD] to move around.

[MOUSE] to look around.

[LMB] to destroy blocks.

[RMB] to place blocks.

[SHIFT] to go down.

[SPACE] to go up.

[CTRL] to go faster.

Hold down **[RMB]** to **drag** and **select** an area where you want blocks to be placed. It's the same for **[LMB]**, but then for destroying blocks.

[ESCAPE] to save your work or to change your settings.

USEFUL FEATURES

Designers en artists die snel en makkelijk de beginfase van een ruimtelijk groot level design willen maken
